MINERAL DECORATIVE FINISH

Marmorino 300

Ready to use

Decorative finish based on lime putty and marble powders, designed to create surfaces with a mineral, textured appearance. Its 0.3 mm particle size and trowel application produce tonal variations and a predominantly matt finish.

Intended uses

- Decorative walls and panels with a mineral appearance.
- Trowel-applied surfaces with texture and tonal variations.
- Samples and decorative work on compatible substrates.

Product data

Property	Value / instruction
Product type	Lime- and marble-powder-based mineral finishing paste
Preparation	Ready to use
Particle size	0.3 mm
Finish	Mineral, predominantly matt; varies with the application technique
Application	Trowel suitable for the decorative system
Pack sizes	4 kg and 24 kg
Colour	White 300 and shades from the 300 colour chart
Recommended interval	8 hours between coats; check that the preceding layer is completely dry
Product pH	Above 12 at 20 °C

Preparation and application

1. Substrate preparation

Check that the substrate is stable, dry, clean and even. Remove dust, friable material and incompatible residues. Select the levelling coat and primer to suit the substrate and decorative system.

2. Material preparation

Stir the ready-to-use paste until uniform, using clean tools. Prepare material of the same colour for the entire area to be treated.

3. Application and working

Apply with a trowel, spreading the material evenly. Work to the required texture and check flatness, joins and tool cleanliness during application.

4. Finishing

Prepare a sample of the complete system. Apply any Wax Gloss or other compatible protective treatment to the dry coating, checking gloss and colour changes on the sample.

Application notes

On-screen colours are indicative. Light, texture and the final treatment affect how the shade is perceived: check the result on a physical sample.

Storage

Store in the tightly closed original container in a suitable place, protected from frost, direct sunlight and sources of heat. Reseal carefully after dispensing and follow the instructions on the label.

Safety

Alkaline product: pH above 12. Avoid contact with skin and eyes; wear gloves and protect the eyes and face. Consult the Safety Data Sheet and label for complete information on hazards, protection and disposal. Do not release the product into the environment.
